

Instructions for Completing Solar Panel Indemnification Agreement

In conjunction with the submission of an Architectural Change Application (ACA) to install solar panels on the roof of a unit, the Unit Owner must include a Solar Panel Indemnification Agreement.

The Unit Owner should print the agreement in black and white and sign, date and have the agreement notarized on the lines highlighted in yellow as shown on the sample document for reference.

The Architectural Control and Landscape Committee will review the ACA for sufficiency and if and when approved, will forward the Indemnification to the Board for signature and notarization.

After both the Unit Owner(s) and the Association have signed and had their portions notarized, the Board will forward the agreement to the Associations' attorney for filing with the deed for the respective unit.
